

Window Material

Crystal Clear 20/20

Crystal Clear 20/20 is made from the finest roll vinyl stock available in the world, resulting in a product that, with the exception of Strataglass, offers superior visually clarity. Crystal Clear 20/20 is the largest press-polished sheet available in the world (54" x 111") which is 17% larger than the industry standard (50" x 100") resulting in significantly less waste in fabrication, and less expensive per square foot.

PART	DESCRIPTION	THICKNESS	COLOR	SIZE	QTY/	ORDER
