

Window Material

Strataglass

Strataglass is a premium, flexible vinyl sheet engineered to resist both the damaging effects from the sun's rays and scratching from handling. Strata's unique scratch resistant coating prevents fine line scratches caused by washing, drying, rolling and abrasion from roll-up straps. The coating blocks these elements from etching into the surface of the vinyl allowing windows to remain clearer longer, so you won't need to replace the curtains as often. Plus, larger sheets make it less expensive per foot.

PART	DESCRIPTION	THICKNESS		SIZE (IN)	QTY/ PKG	ORDER BY
		(MIL)	COLOR			
YFG30	Stataglass Sheet	30	Clear	54 x 111	5	Sheet
