

TiO₂⁺ UV Coated Sailcloth

		Warp x Fill
Width	Fabric	Denier
54"	4.5 TiO ₂ ⁺	150 x 250

54" width stocked, but we are happy to slit full rolls to other widths plus tapes.

Color
<ul style="list-style-type: none">• Titanium Dioxide Plus impregnated, white pigment additive urethane coated on the surface of both sides of finished sailcloth.• Can be used in radial or crosscut sails.

The fabric is knife coated with urethane impregnated with Titanium Dioxide-Plus and white pigment. The new UV coatings mold to the filaments, as in this photo, with better adhesion and life than older coatings, which cracked and flaked.
