

## **TiO<sub>2</sub><sup>+</sup>** UV Coated Insignia

Warp x Fill	
Width	Denier
54"	150 x 150
<i>54" stocked only, but we are happy to slit full rolls to other widths.</i>	

### Color

- Titanium Dioxide Plus impregnated, white pigment additive urethane coated on one side, pressure sensitive adhesive and release paper on the other.

The fabric is knife coated with urethane impregnated with Titanium Dioxide-Plus and white pigment. The new UV coatings mold to the filaments, as in this photo, with better adhesion and life than older coatings, which cracked and flaked.
